

US Ignite Application Summit 2014

June 24-27, 2014 • Sunnyvale, CA

The US Ignite Application Summit is the premier event for innovative developers, entrepreneurs, technology companies, forward-thinking communities, leading university researchers, students, and federal agency leaders to gather, learn, and showcase their work using high capacity, next-generation networks to change the way Americans are able to work, live, learn and play.

This event demonstrates the need for gigabit networks by showcasing technology innovations that are only possible when homes, offices, schools, libraries, hospitals and other community institutions are interconnected by advanced high speed broadband networks.

Our partners will showcase applications that redefine how we access everything from telehealth to online education. The US Ignite Application Summit is uniquely positioned to advance the public benefit of software defined networks (SDN), local cloud computing and symmetric gigabit speed to end-users and transform the public sector.

SHOWCASE

- Main stage and application expo featuring live demonstrations of truly next generation Internet applications from university and corporate labs
- Annual US Ignite awards spotlighting the most transformative next-generation applications

LEARN

- Keynotes from technology visionaries helping to define the future of the Internet
- Tech talks and workshops on hot topics like the direction of technology investments, approaches to SDN and the Internet of Things

TAKE ACTION

- Case studies, success stories and sharing of best practices to improve your group's initiatives
- Opportunities for networking between developers, communities and industry participants generate new collaborations and valuable partnerships

Get Involved

Join existing US Ignite partners in this effort and give your organization a unique opportunity to spotlight your projects directly to the nation's top network technologists, government decision makers and innovative professionals.

To include your organization in this event, contact Joe Kochan at joe.kochan@us-ignite.org.
